

1-

The skill 'Cloud & Distributed Computing' holds the highest global ranking. However, after clicking the skill and examining the data for China, a green dot indicates that, while still highly demanded, it is relatively less prioritized in China compared to its global standing, ranking as the fourth most in-demand skill there.

2-

By clicking on Ireland we can see the most 5 in-demand skills which comes at this order:

Cloud & Distributed Computing: Ranked 1st

Statistical Analysis & Data Mining: Ranked 2nd

Web Architecture & Development Frameworks: Ranked 3rd

Network & Information Security: Ranked 4th

SEO/SEM Marketing: Ranked 5th

These rankings show the relative importance of these skills within Ireland's job market.

3-

By hovering over the intersection between the skill "SEO/SEM Marketing" and Australia, we

can see that although it is ranked the ninth most in-demand skill globally, it is the second most in-demand skill in Australia. This indicates that "SEO/SEM Marketing" holds significantly higher importance in the Australian job market compared to its global standing
